GATORBAR

# Fiberglass Rebar

Rust-Proof | Lightweight |  
Cost-Efficient | 2x Stronger  
than Steel

## GATORBAR FIBERGLASS REBAR

Gatorbar Fiberglass Rebar is a lightweight, high-strength, rust-proof alternative to traditional steel reinforcement. At just a fraction of the weight of steel, Gatorbar is easier to transport, handle, and install—all while delivering superior tensile strength. Its corrosion resistance makes it ideal for long-lasting concrete projects, reducing maintenance costs and extending service life.

- **Driveways & Sidewalks**

Reinforces flatwork to reduce cracking and extend service life.

- **Slabs & Foundations**

Lightweight, easy to place, and corrosion-proof for long-lasting structural integrity.

- **Concrete Flatwork**

Provides consistent reinforcement while saving time and labor compared to steel.

- **Infrastructure Projects**

Ideal for high-moisture or corrosive environments where steel rebar would fail.

#3 Rebar Available at all Bierschbach Locations.
