

TELEMATICS ENABLED RENTALS

Available at Bierschbach
In Partnership with Tierra & Topcon

Customer Benefits of Telematics

- ✓ **Monitor Machine Location**
GPS monitoring shows your machines' current and past locations, notifying you when a geofence or curfew is violated.
- ✓ **Real-Time Visibility & Reporting**
Track location, usage hours, fuel levels, and machine health from any device.
- ✓ **Sustainability Tracking**
Monitor idle time and emissions to support green initiatives and compliance.

Your Project Partner - Now Smarter with Telematics

At Bierschbach, we're more than just an equipment rental company. With locations across the Midwest, we're committed to providing reliable machines, expert support, and solutions that keep your project moving. Now, we're taking that commitment a step further with telematics-enabled rentals, smart technology that tracks equipment location, usage, and maintenance needs in real time.

AT20G Device

The AT20G is a compact, battery-powered asset tracker designed for non-powered trailers, equipment, and attachments. Built for durability and ease of use, it offers reliable performance in tough conditions:

- Long-lasting internal battery with up to 10 years of life
- Compact design for simple installation
- IP68-rated for water and dust resistance
- Ideal for tracking, geolocation, and recovery in rugged environments

AM35 Device

Telematics systems are only as strong as the devices used to transmit data. The AM35 is built for versatility across applications and vehicle types, and it ensures consistent performance and valuable insights:

- 4G technology with 3G and 2G fallbacks for extended connectivity
- Supports utilization tracking & preventative maintenance alerts
- Provides notifications, reporting, and data mapping
- Designed to meet international telematics needs across industries

Why Rent From Bierschbach?
