# REPAIR & PATCHING PRODUCTS

## SPEED CRETE BLUE LINE

Cementitious repair mortar used for underwater or submerged repairs, below-grade structures, and vertical application surfaces.

## SPEED CRETE RED LINE

Fast-setting, polymer-modified repair mortar used for surface and spot repairs, and pavement patching.

## TAMMS THIN PATCH

Polymer-modified cementitious mortar for patching, filling small holes, repointing mortar joints, and resurfacing floors, walls, or overhead concrete.

## TAMMSPATCH II

Polymer-modified cementitious mortar used for resurfacing, leveling, repair work, decorative overlays, and joint pointing.

## EXPRESS REPAIR

Ready-to-use, concrete repair mortar used for patching and repairs.

## CONCRETE MIX

Ready-to-use blend of cement, sand, and gravel designed for general-purpose concrete work.
