Rates available at the Dickinson location. Bierschbach Equipment & Supply is committed to providing reliable, well-maintained rental equipment backed by clear rental terms and optional Rental Equipment Protection (REP) coverage for added peace of mind. Customers are responsible for safe operation, proper towing and maintenance during the rental period, as well as returning equipment in the same condition received, with normal wear and tear accepted. All rentals are subject to the terms and conditions of the Bierschbach Equipment & Supply Lease-Rent Agreement, including applicable usage limits, insurance requirements, and additional charges for overtime or damage beyond normal wear.

Why Rent from Bierschbach Equipment & Supply?

Bierschbach is the first name in construction equipment for rent and sale in the Midwest. Our experts can help train your team on our well-maintained, late-model equipment.

Get the equipment you need—when you need it—without the long-term investment. Our rental fleet is well-maintained, jobsite-ready, and backed by a team that understands your work. With five locations and responsive support, we help keep your projects moving without interruption.

Rentals are available for pickup or delivery. Our rental department offers an extensive variety of equipment.

- Late-model, job-ready fleet
- Fast, flexible rental terms
- Expert support from people who know your job
- Five locations, ready to serve

Customer Benefits of Telematics

At Bierschbach, we're more than just an equipment rental company. With locations across the Midwest, we're committed to providing reliable machines, expert support, and solutions that keep your project moving. Now, we're taking that commitment a step further with telematics-enabled rentals, smart technology that tracks equipment location, usage, and maintenance needs in real time.

- **Monitor Machine Location** - GPS monitoring shows your machines' current and past locations, notifying you when a geofence or curfew is violated.
- **Real-Time Visibility and Reporting** - Track location, usage hours, fuel levels, and machine health from any device.
- **Sustainability Tracking** - Monitor idle time and emissions to support green initiatives and compliance.

Call today to reserve your equipment.
